

2025 Silicon Motion Company Profile

Silicon Motion at a Glance

Leading Merchant Supplier in NAND Flash Controllers

Silicon Motion's controllers are widely used in data centers, PCs, smartphones, automotive, commercial and industrial applications

22+ Year

Focus on NAND controller design

Over 10 Billion

NAND controllers shipped

30+% Market Share

In Client SSD controller market

Support **All** NAND flash makers

2002

Established in
Hsinchu, Taiwan

2005

NASDAQ IPO
SIMO

1800+

Employees

Silicon Motion Revenue Trend

Last 3 years

Last 5 quarters

More than NAND Flash Controllers

Silicon Motion is the Core Partner of NAND Storage Ecosystem

Enabling

Developing various NAND controllers & firmware technologies to enable quick time to market with new generation NAND

Collaboration

Actively engaging with all partners in every application ecosystem to drive innovative customer products

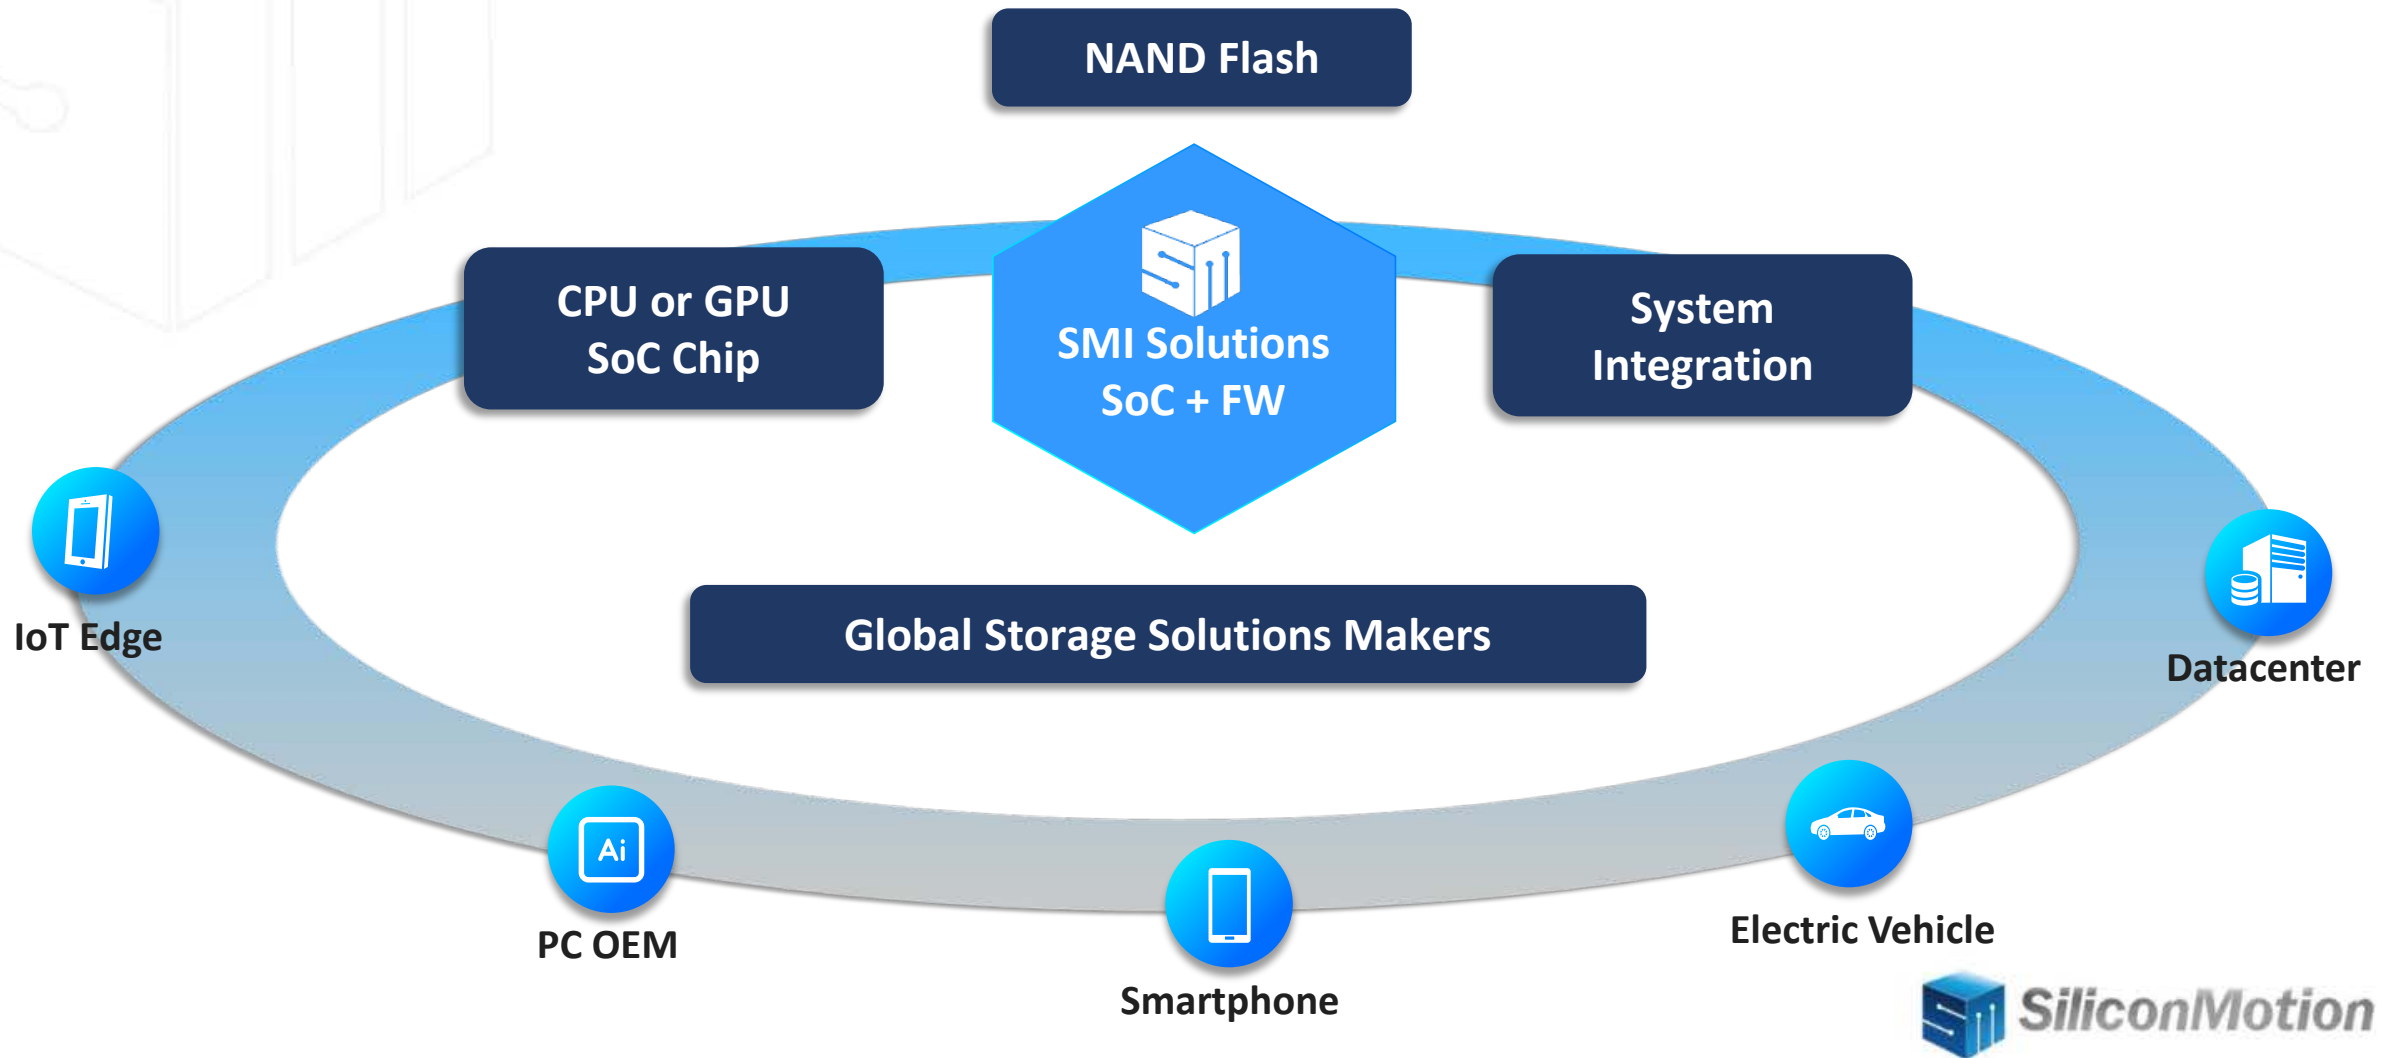

Engaging

Providing turnkey or SDK solutions with flexible business model to support all module makers and OEM customers to achieve qualification & validation with all applications

Silicon Motion Participates in The Entire Storage Ecosystem

Breaking New Ground of NAND Controllers

Silicon Motion Develops Full Turnkey Controllers with Firmware Solutions

NAND Controller Expert

- Over 22 years NAND controller & firmware development experience with all NAND makers
- Deep knowledge in NAND

High Speed and Low Power

- Leading-edge process technology nodes
- High speed SerDes IPs
- Unique ASIC and FW design methodology

Low Latency and QoS

- State-of-the-art firmware algorithms & architecture
- Patented ECC technology

Flexible and Fully Support

- Various advanced packaging solutions to support different storage products and PCB design

Flexible Solutions Enabling Customer Application Success

Silicon Motion provides a flexible development model to help customers design products for diverse applications

Applications

SMI supports Applications Systems Integration : Testing & Validation

Client/Enterprise/Industrial SSD

Our Worldwide Top Tier Customers & Market Play

A large, 3D-rendered square chip with a grid of pins around its perimeter. The letters 'Ai' are prominently displayed on the chip's surface. The 'A' is large and blocky, while the 'i' is smaller and more stylized. The background is a complex, futuristic circuit board with glowing orange and blue lines and a grid of square components.

Ai

**Silicon Motion is driving
innovation storage for AI**

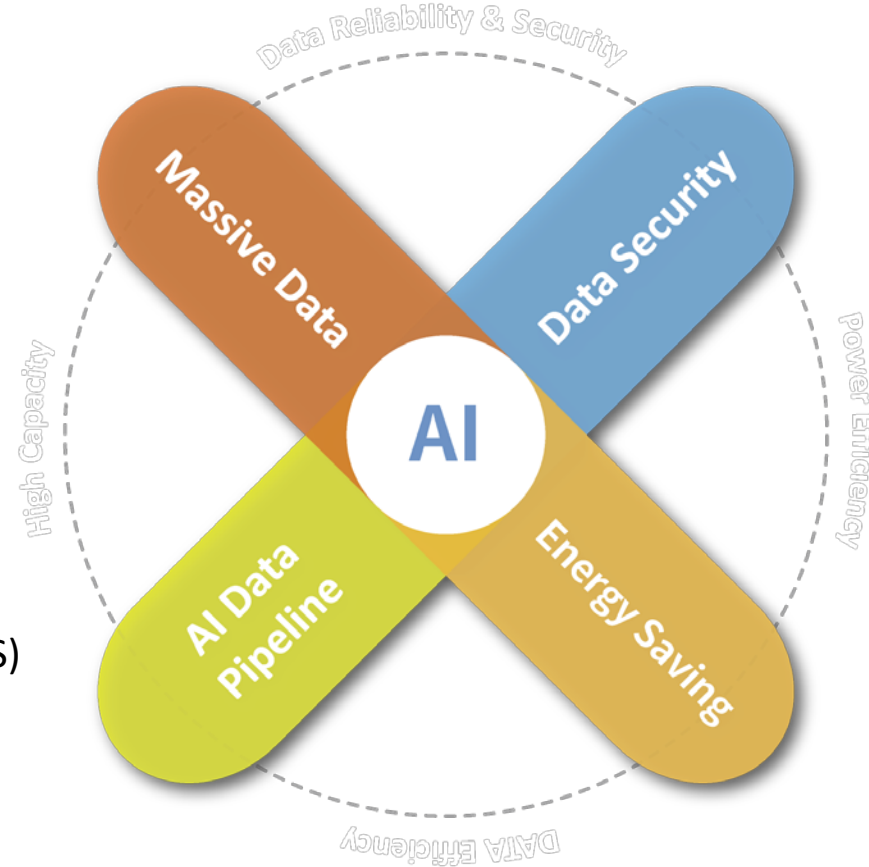

Cutting-Edge Technology Empowering Storage with AI

High Capacity

- Silicon Motion's controller enables all QLC NAND
- 8th Gen. NANDXtend with On Disk Training Algorithm

Data Efficiency

- Optimizing direct data placement technologies: Zoned Namespaces (ZNS) and Flexible Data Placement (FDP)

Data Security

- Privacy Protection: Multi-Factor Authentication (MFA)
- Preventive Measures: Tamper-resistant hardware, Advanced Encryption Standard.
- IntelligentGuard™ Data Encryption with Authenticated Firmware Protection
- End to End Data Protection

Power Efficiency

- Re-arranging power islands in ASIC
- Re-architecture LDPC engines and Data Pipes
- Advanced EUV process
- On Disk Training algorithm
- 8th Gen. NANDXtend® ECC Technology

The Best Power/Data Efficient Client PCIe 5.0 SSD Controller

3x

Data Efficiency

<7W

SSD Power

SM2508

- PCIe Gen5x4, NVMe2.0
- 8 NAND channels, up to 3600MT/s
- TSMC 6nm process
- 4x armTM Cortex-R8+ 1x CortexTM-M0
- Supports up to 8TB
- Sequential read: up to 14.5GB/s
- Sequential write: up to 13.6GB/s
- Up to 2.5M IOPS random performance

Maximizing Storage Efficiency in AI Smartphones

1.5x

Lower Power better

2x

Extended flash life cycle

SiliconMotion

UFS 4.0

SM2756

- JEDEC UFS 4.0 Compliant
- Support HS-Gear-5 x 2-lane
- MPHY v5.0
- UniPro standard v 2.0
- Supports up to 2TB

- 2 Channel, support 1.8V/1.2V I/O,
- Toggle DDR 5.1, ONFI 5.1
- Sequential read : 4300MB/s
- Sequential write: 4000MB/s

The World's First Automotive PCIe Gen4 SSD Controller

>30%

Host Power Reduction

SM2264XT-AT

up to 8

Virtual Function

- PCIe Gen4x4 NVMe1.4 adding on NVMe2.0 key features
- Support up to 8 Virtual Function
- Smart bandwidth and latency shaping for SR-IOV

- Enhanced security support
- TSMC 12nm process
- 4x ARM Cortex-R8

Maximizing AI Pipeline Storage Performance

MonTitan

Up to 25%

Random Read Performance improvement to competitive controllers

Faster LLM Training and GNN completion times

Enterprise Features

- PCIe Gen5, Dual Ported.
- NVMe 2.0
- OCP NVMe SSD Spec.
- SR-IOV / MPF
- Namespaces
- SMART Monitoring
- E2E Data Protection
- Secure Boot
- AES-256
- TCG Opal
- Attestation

High Performance

- Sequential : 14+ GB/s
- Random: 3.5M IOPS (4KB)

Thank You!
