Engage

Serve & Support

SiliconMotion

~30% Market Share in SSD Controller Market

Leader in PC OEM PCIe NVMe QLC SSDs

NAND Transitions for Client SSD

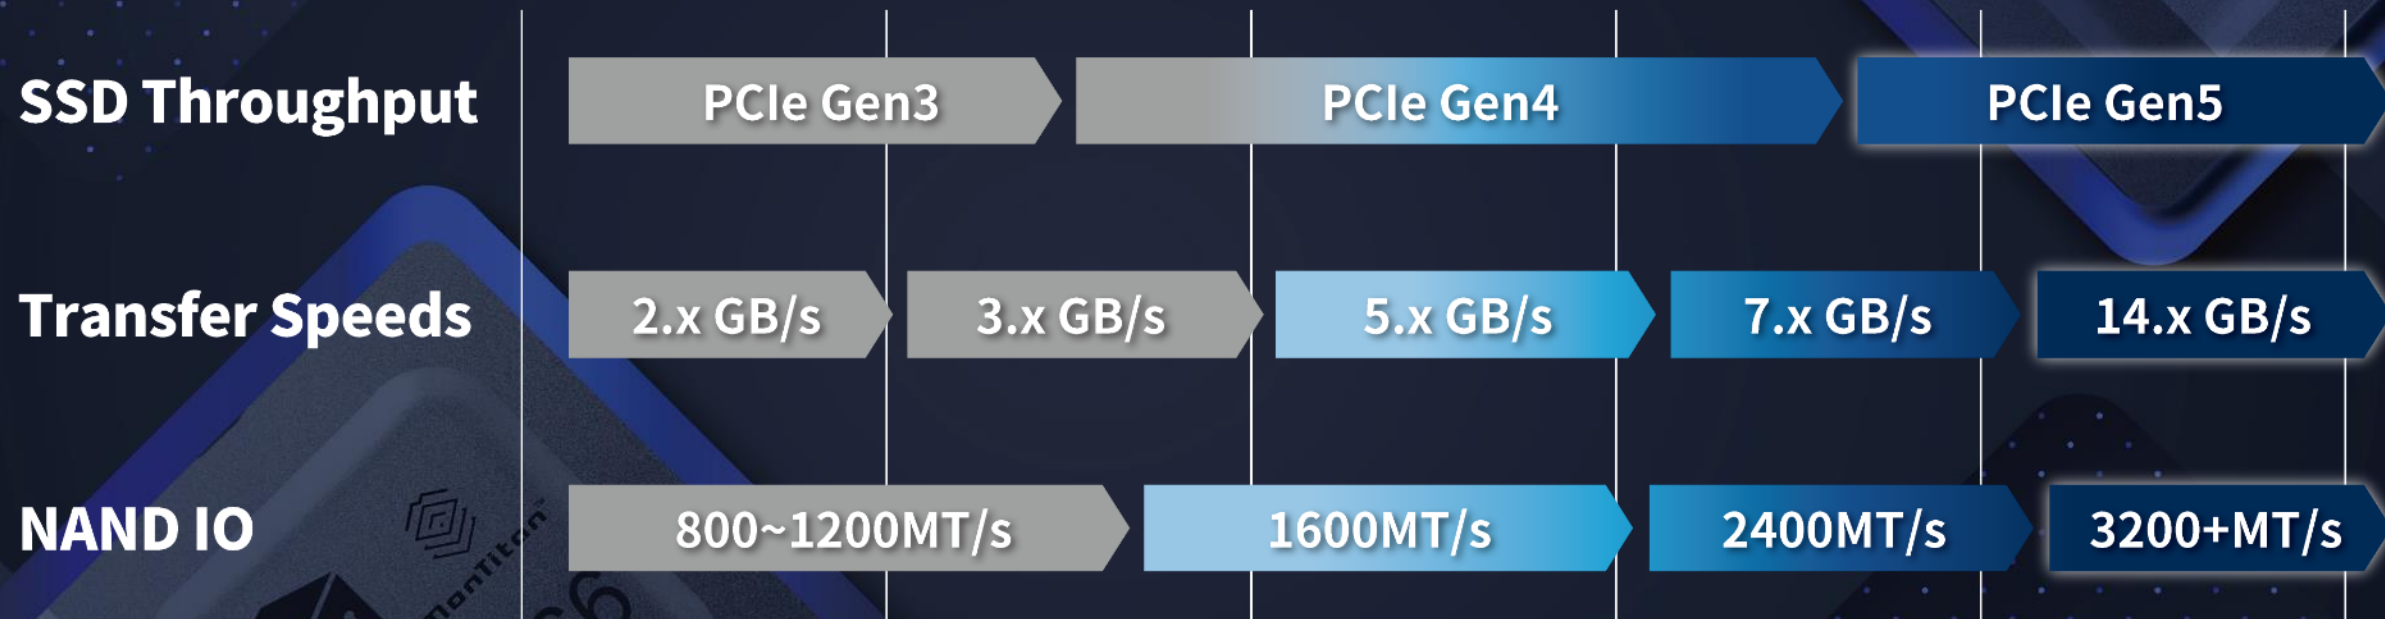

Client SSD Market Trend

SMI internal estimates

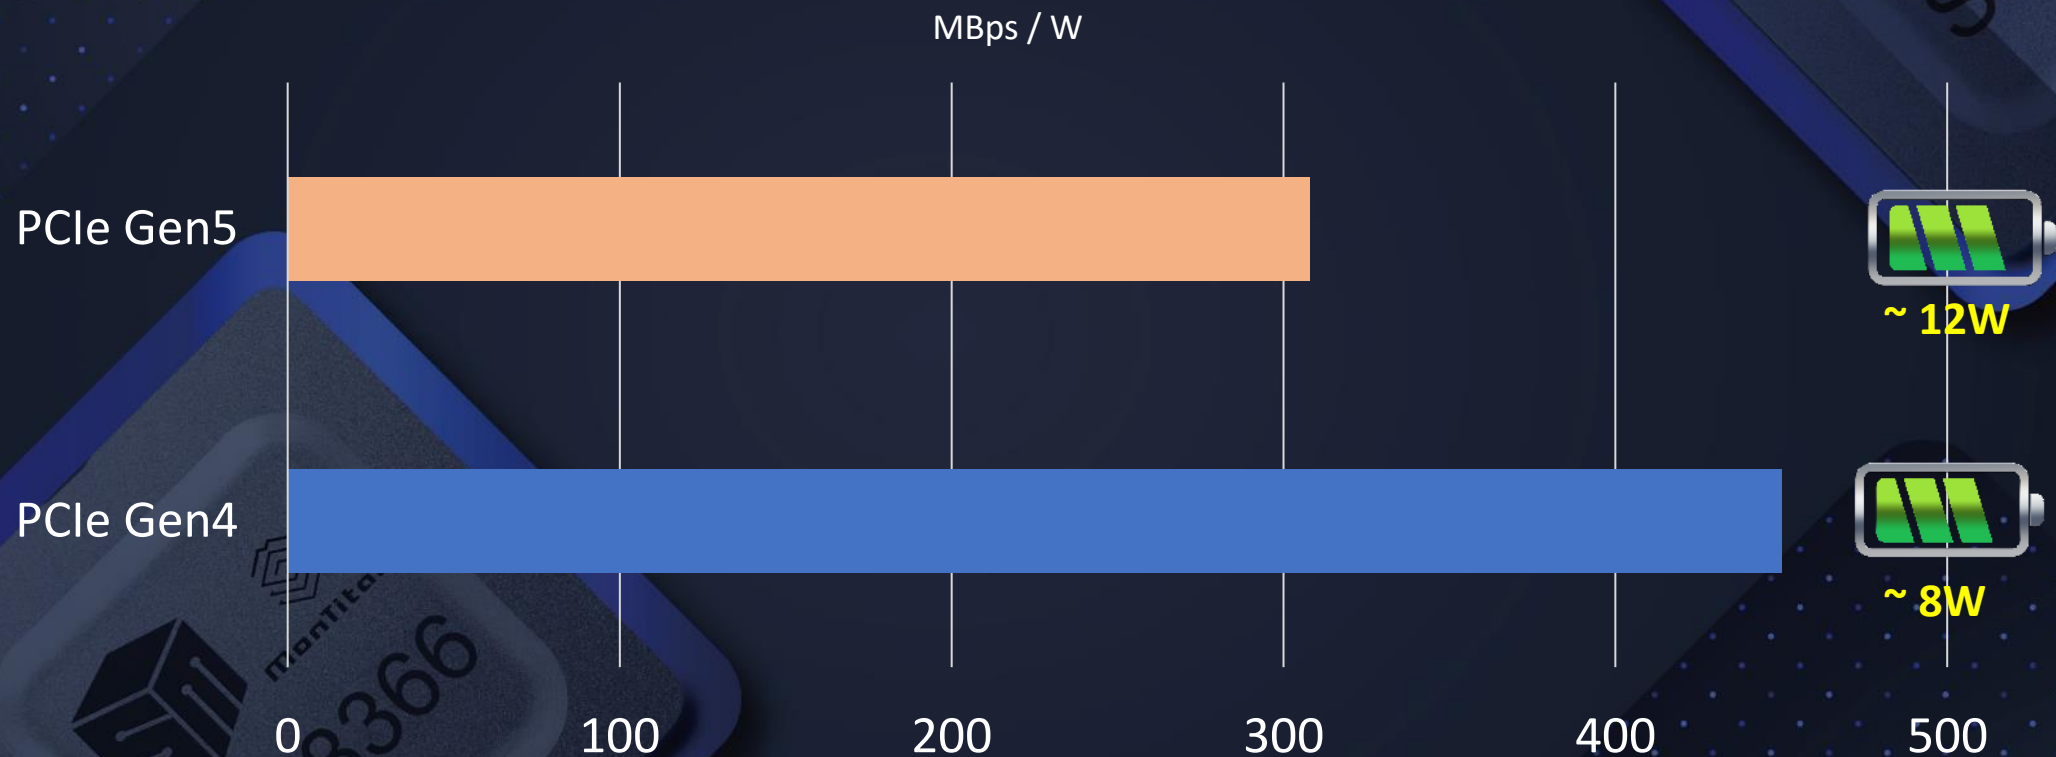

NVMe Client SSD Controller Technology Transitions

Performance Per Watt

Performance Per Watt

The test results conducted by SMI's VCT lab

SSD with Fan ! Make Sense?

Efforts to reduce the power even further

7 ~ 10 W

- Use Advanced process nodes
- Power efficient ASIC design methodology
- Lower NAND power consumption
- System level power management optimization
- Host assisted workload optimization

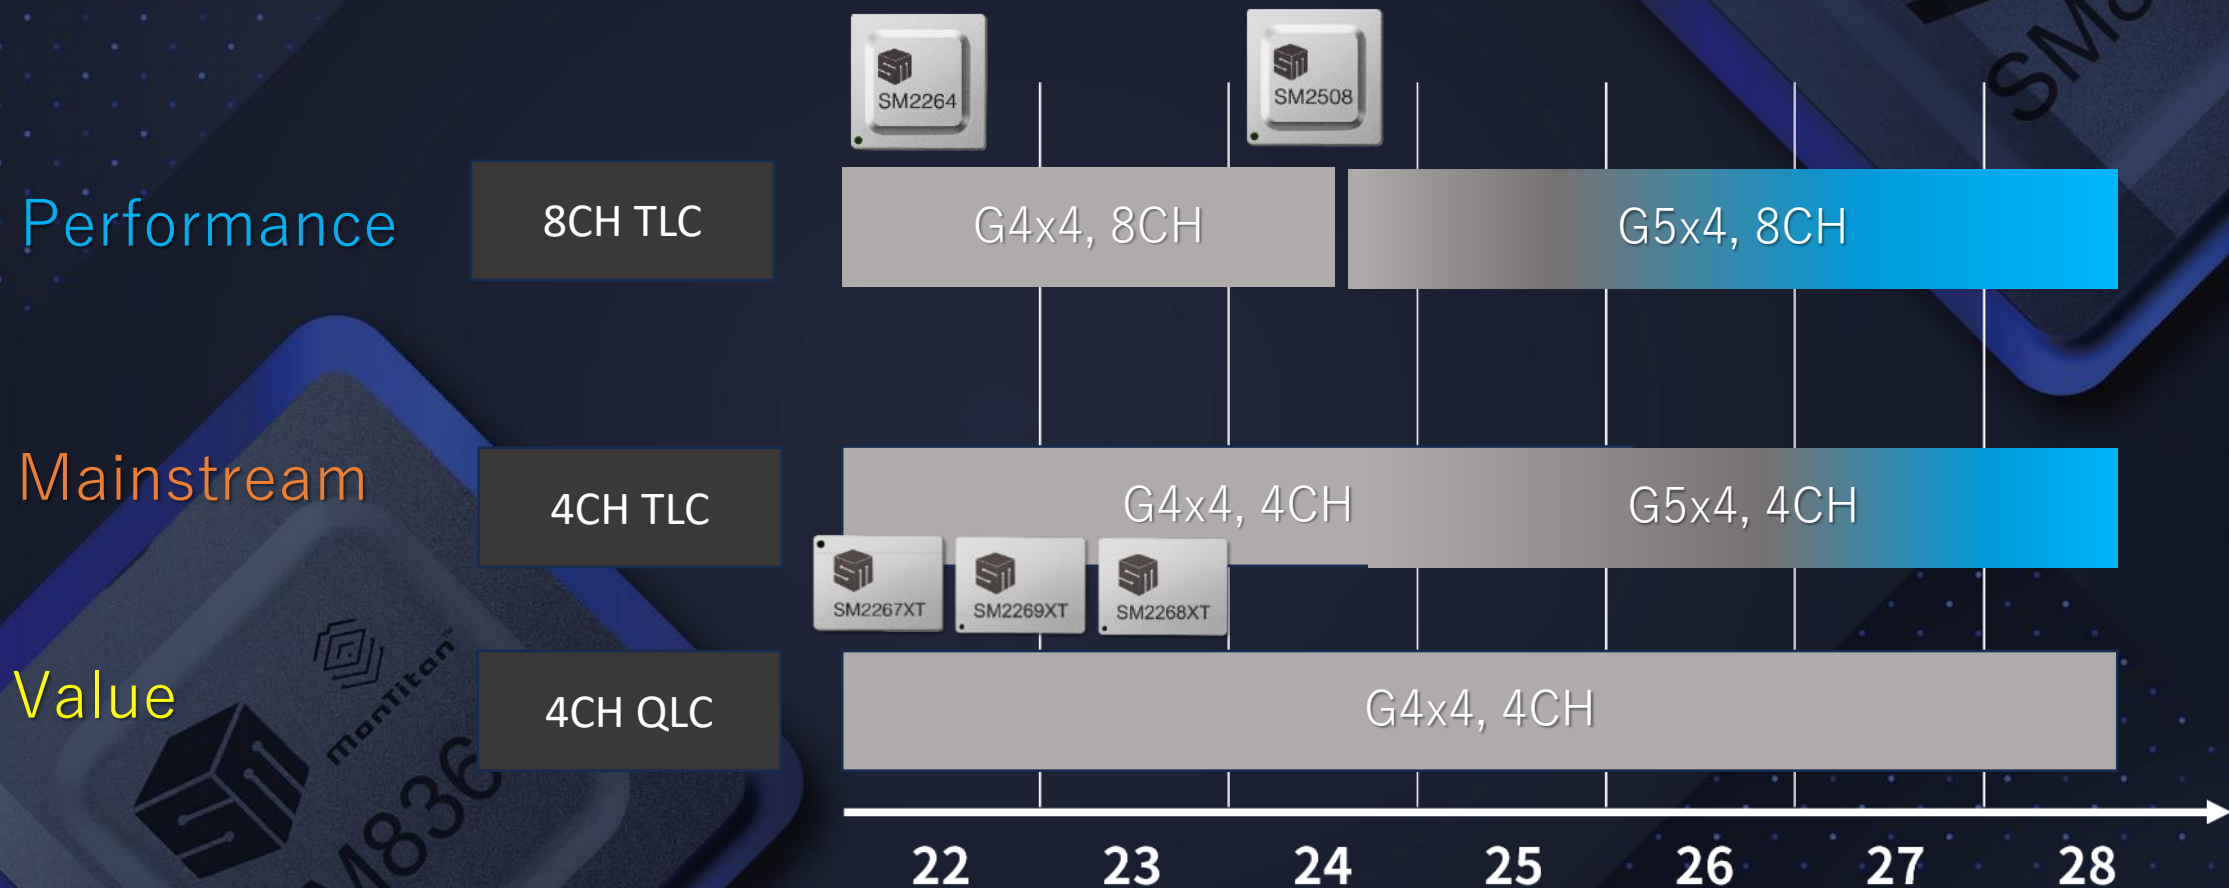

Silicon Motion Client SSD Roadmap

Silicon Motion Client SSD Roadmap

Silicon Motion Client SSD Roadmap

SM2508 Controller for PCs

- PCIe Gen5 x 4, NVMe 2.0
- NAND Interface: x8 NAND Channel
- Supporting 3600MT/s per channel
- 3D TLC / QLC Supported
- Power Consumption: ~3W (Ave.)

Performance

- Sequential Read: ~14GB/s
- Sequential Write: ~12GB/s
- Random Read: ~2.5M IOPS
- Random Write: ~2.4M IOPS

SSD Controller for Automotive

Automotive E/E Architecture Evolution

Electronic/Electric Architecture From Distributed to Centralized & Zone

Traditional Architecture

Domain Architecture

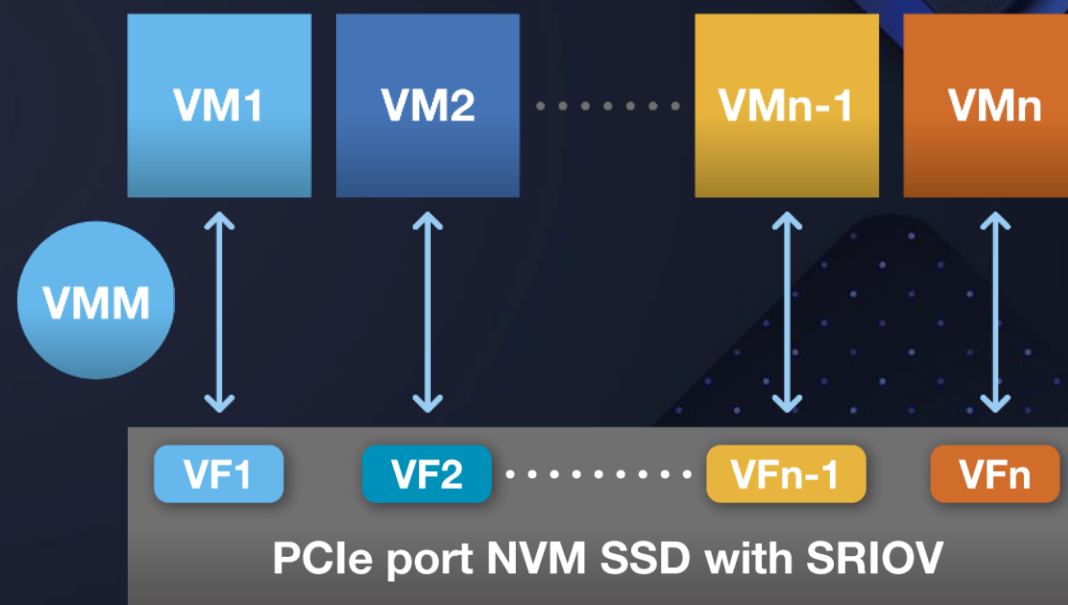

Centralized & Zone Architecture

Future

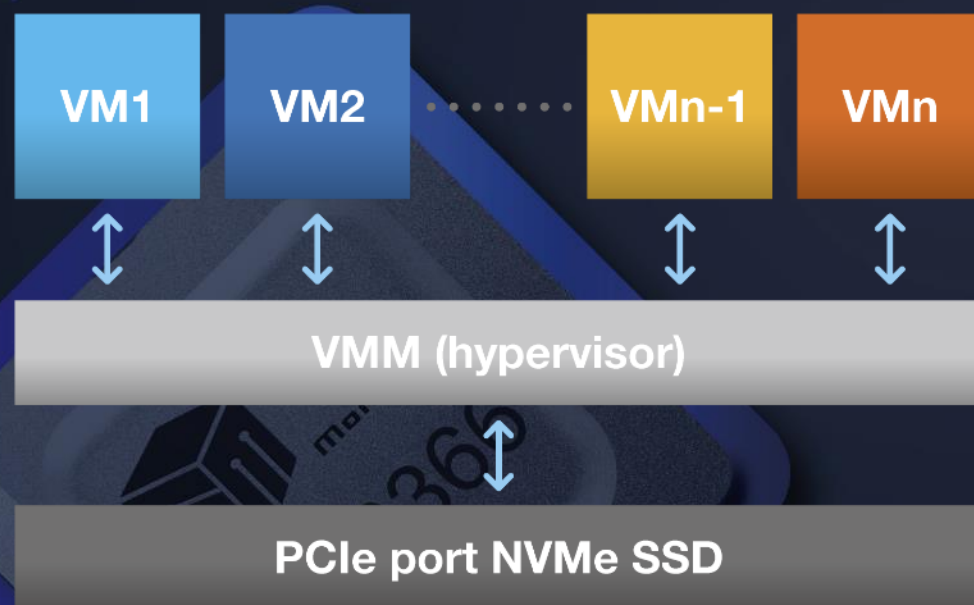

Built-in SR-IOV Capability for Automotive Storage

One Storage Directly Support Virtual I/Os to Multiple VFs

Built-in SR-IOV Capability for Automotive Storage

One Storage Directly Support Virtual I/Os to Multiple VFs

SM2264XT-AT for Automotive

- PCIe Gen4 x 4, NVMe 1.4
- NAND Interface: x8 NAND Channel
- Supporting 1600MT/s per channel
- Built-in SR-IOV Capability
- 3D TLC / QLC Supported

Performance

- Sequential Read: 7000 MB/s
- Sequential Write: 6500 MB/s
- Random Read: 1000K IOPS
- Random Write: 1000K IOPS

SMI SSD Controllers for Automotive Quality

Qualification

TSMC Automotive Service

- Tightened process control and scrap criteria
- Documentations and FA

Data Path Protection

- End-to-end data path protection
- SRAM ECC for SRAM soft/hard errors

AEC-Q100 Grade2 / Grade3

Grade 2: -40°C to +105°C
Grade 3: -40°C to +85°C

ASPICE certification

SMI Automotive team follow ASPICE process to maintain product design flow and documentation control.

Certification

IATF16949 compliance

FMEA (Failure Mode and Effect Analysis) Zero-defect quality management standard

Functional Safety for ISO 26262

Safety Levels: ISO26262 for ASIL A, ASIL B, ASIL C and ASIL D

Traceability

OTP controller die stores unique ID to trace back wafer map or wafer lot

MonTitan™

SM8366 SSD Controller

Enterprise Features

- PCIe Gen5, Dual Ported.
- NVMe 2.0
- OCP NVMe SSD Spec.
- SR-IOV / MPF
- Namespaces
- SMART Monitoring
- E2E Data Protection
- Secure Boot
- AES-256
- TCG Opal
- Attestation

High Performance

Sequential : 14GB/s
Random: 3GB/s

Enterprise Firmware Support Options

Turnkey

Layered FW

SDK

PermaShape™

- Isolate at the IO command level focusing on Tenant performance
- **QoS Sets** are defined through application specifics and / or mapped to specific media hierarchy
- Eliminate noise neighbor effects while maintaining maximum SSD performance

PCIe Gen5 NVMe SSDs

FW Provides Fastest Time to Market and Lowest Development Cost

- NVMe 2.0
- OCP NVMe Data Center Specification 2.0
- Hardware Reference Design Kit, U.2, E1.S, E3.S
- Improved QoS with PerformaShape™ Technology

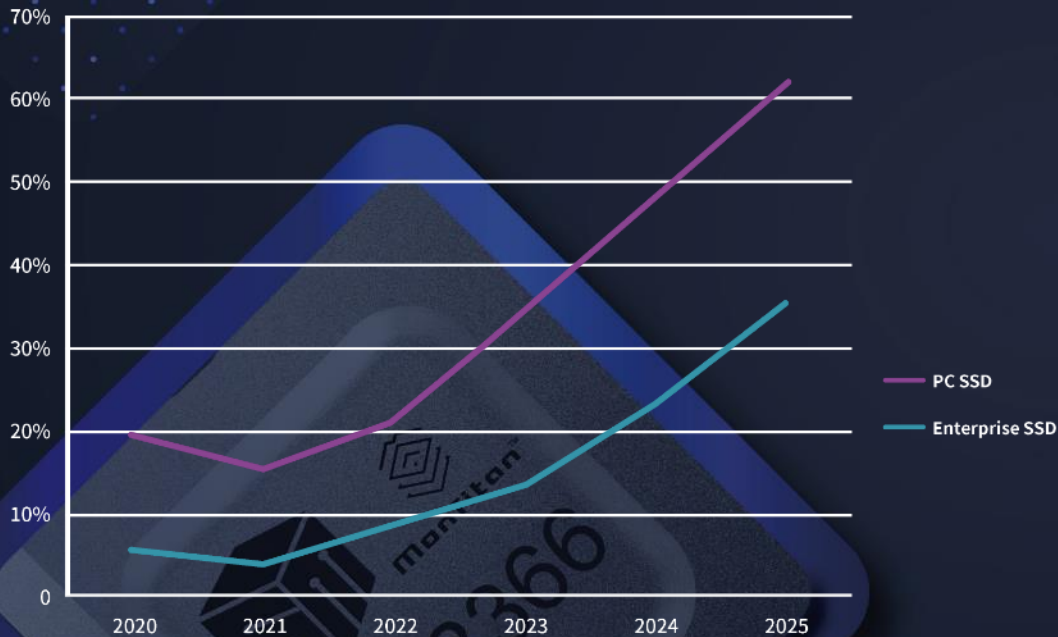

8TB, U.2 Performance

- Sequential Read 14GB/s
- Sequential Write 11GB/s
- Random Read 3.0M IOPS (4KB)
- Random Write 425K IOPS (4KB – 7% OP)

QLC Presents Opportunity

3D NAND QLC Adoption

- Cost benefit promises of QLC NAND
- Acceleration of higher capacity support
- Early adoption by AFA suppliers that have host-based control of data placement and system level performance

PCIe Gen5 QLC based ZNS SSD

Application Specific Data Placement Unlocks the Lower Cost QLC SSDs

- Extended SSD Life by reducing WA
- Reduced Latency; Improved Throughput
- Enable Higher Capacity SSD
- Reduction in DRAM Footprint

- 16TB, ODP QLC NAND
- User Configurable Number of Zones, 4-32
- Best in Class QoS

U.2 16TB Performance

Sequential Read 14GB/s
Sequential Write 2.2 GB/s
Random Read 2.2 M IOPS (4B)

In Summary

Silicon Motion provides innovations in Client, Automotive and Enterprise Markets:

- Power Performance Optimizations during the PCI Gen4 -> PCIe Gen5 Transition
- Acceleration of lower cost QLC solutions
- Automotive controller with SR-IOV will enable the future central computing architecture in cars
- Customer Collaborative Turnkey and Layered Firmware
